

**“Helping organizations attain
safety excellence since 1980”**

Take a quick test to determine if your safety culture is floundering. *Check all that apply to your organization:*

- Organizational safety performance is cyclic
- Safety goals focus on trailing performance indicators
- Senior leaders are not demanding safety performance excellence
- Senior leaders are not leading the safety effort
- Safety professionals are viewed as owners of the safety process
- Safety professionals are held responsible for safety results
- Managers and supervisors don't accept responsibility for safety performance outcomes
- Managers and supervisors are not held accountable for safety performance results
- Managers and supervisors blame workers for incidents
- Root causes of hazards or incidents are not properly addressed
- Worker risk-taking is condoned and encouraged for the sake of meeting customer demands
- Rules are not being rigidly or consistently enforced by supervision
- Workers routinely violate rules and procedures
- Consequences for rule deviations are inconsistently applied
- Consequences for rule deviations are weak
- Supervisors and workers are not personally engaged in measurable risk reduction activities every day
- Safety accountability measures are ineffective or non-existent
- Work output, quality, and financial issues strongly overshadow safety performance

If you checked some of the above, our *LeadSAFE* process will help lead your organization to new heights in safety performance.
